

ASSESSMENT OF APPROPRIATENESS OF BMPS

City of Eastborough is a unique community; it is surrounded on all sides by, the largest city in the State of Kansas, Wichita. City of Eastborough has no businesses and no commercial real estate. City of Eastborough is made up of entirely single-family homes encompassing 0.4 square miles with two paid city staff. City of Wichita has a Storm Water Utility budget in excess of 10.8 Million Dollars and 39 full-time employees to monitor and comply with permit M-AR94-S001. In an effort to create the most value for the taxpayer, City of Eastborough should leverage many of City of Wichita's tools to increase the efficacy of our program and reduce the shadow of bureaucracy. I believe the energies we have applied to our BMPs are encouraging our efforts to achieve the statutory goal of reducing the discharge of pollutants to the Maximum Extent Practicable (MEP). This program as a whole is excessive for the size of this municipality and its extremely limited threat of illicit discharges.

ASSESSMENT OF EFFECTIVENESS OF BMPS

Our wet weather monitoring program was successful in accomplishing 4 of 4 required storm sampling events to verify BMP's in the SMP by monitoring TMDL's. No abnormal results were detected.

DATA ANALYSIS

Under the City of Eastborough Permit, Water Sampling and data analysis was accomplished under BMP (3) Illicit Discharge Detection and Elimination. City of Eastborough was able to accomplish 100% of water samples. Every sample was input into the eDMR system. We will continue to strive to meet 100% compliance.

STORM WATER ACTIVITIES FOR CALENDAR YEAR 2025

City of Eastborough's BMP's will remain in place for all of 2025. City of Eastborough will continue to welcome citizen involvement and will continue to solicit citizen input to refine its program.

UPDATED ORDINANCES OR RESOLUTIONS ASSOCIATED WITH THE SMP

City of Eastborough believes it is in compliance with all mandatory ordinance requirements.

OTHER PARTIES RESPONSIBLE FOR IMPLEMENTING PROGRAM AREAS

- Stormwater map is created and monitored by MKEC of Wichita, KS.
- Water samples, when collected, will be analyzed by Meridian Analytical Labs in Wichita, KS.
- Due to our proximity, Eastborough residents view City of Wichita education and outreach in a similar manner to residents of Wichita, KS.
- Sedgwick County in cooperation with Hazardous Waste Collection and Ordinance G23-04.
- Minneha Township is a paid entity of City of Eastborough and provides quarterly street sweeping.
- Landscape Solutions provides Inlet & Outflow cleaning, Park & City Maintenance.
- Treetop Nursery provides Park Maintenance.

EXECUTIVE SUMMARY

City of Eastborough is a well-maintained City that is especially successful at the objective of reducing pollutants in stormwater discharges. The town presents as well maintained and beautiful urban area filled with parks and high-quality homes. The bureaucratic requirements for the documentation of the city's accomplishments in compliance with the permit are the most arduous items associated with the program, as City of Eastborough has only one paid city staff member for accomplishment of all duties. City clean-ups are accomplished primarily by a contracted team not by residents. Mayor accomplishes all stormwater duties and is unpaid by either position. City of Eastborough leverages multiple partnerships with City of Wichita and Sedgwick County.
